I, ________________________ (print complete name), under oath, declare that I do not have a valid South Dakota driver license or South Dakota nondriver identification number, and that I have not been issued a social security number. 2. If the number check matches, a check will be performed against the last name on the driver license.
3. If the number check matches, a check will be performed against the first name on the driver license.
4. If the number check matches, a check will be performed against the date-of-birth on the driver license.

5:02:08:00.05. Methodology for conducting the random sample for a statewide candidate, initiative petition, referred law petition, or initiated constitutional amendment petition. Upon receiving any statewide candidate petition, initiative petition, referred law petition, or initiated constitutional amendment petition, the secretary of state shall use the following method for conducting the random sample:

(1) Each sheet within the petition shall be consecutively numbered;

(2) A spreadsheet consisting of rows and columns shall be created listing each petition sheet number in a column and the number of eligible signatures, as defined in subsection 4(d), in a separate column;

(3) The Office of Secretary State must use the tables in subdivision (8) which identifies how many signatures shall be randomly sampled to meet the statutory requirement based on the number of petition signatures submitted. Microsoft Excel functions, or a similar program
as determined by the secretary of state, shall be used to randomly select the signatures for validation;

(4) Each signature in the random sample shall be evaluated as to whether the signature is valid or invalid pursuant to §§ 5:02:08:00 and 5:02:08:00.01, and in accordance with:

(a) No signature line may be counted unless the person is a registered voter in the county indicated in the signature line;

(c) A signature line consists of two rows containing six fields each, signature line is separately numbered as per § 5:02:08:00.03;

(d) An eligible signature is a signature line that is filled in partially or completely. If a signature line is empty or crossed out, said signature line is not included as an eligible signature. A signature line containing an abstract mark or markings shall be counted as an eligible signature; and

(e) A random sample signatures are those eligible signatures contained in the random sample generated by the program designated in subdivision (3). The total number of valid signatures submitted is extrapolated from the random sample;

(5) The total number of valid signatures is determined by:

(a) Subtracting the number of invalid random sample signatures from the total number of random sample signatures;

(b) Next, determine the percentage of valid signatures in the random sample signatures by dividing the number of valid signatures by the total number of random sample signatures;

(c) The resulting percentage is multiplied by the total number of eligible signatures submitted; and

(d) The resulting number is the number of valid signatures the secretary of state uses to determine how the petition is certified;

(6) If the number of valid signatures as determined in subdivision (5) is equal to or greater than the required number of signatures needed to file the petition, the secretary of state shall certify the petition as filed;

(7) If the number of valid signatures as determined in subdivision (5) is less than the required number of signatures needed to file the petition, the secretary of state shall certify the petition as not filed; and
(8) The table below identifies how many signatures shall be randomly sampled to meet the state requirements:

(a) If the sample size number is less than the safe harbor sample size number the Secretary of State shall use the safe harbor sample size number; and

(b) If the number of submitted signatures is between two numbers listed in the signatures submitted column, the Secretary of State shall round down to the lower number if the number is 500 or less and shall round up if the number is 501 and higher.

**Law Implemented:** SDCL 12-17B-5.

5:02:09:01.02. **Test of tabulating equipment.** The person in charge of the election shall conduct tests of the automatic tabulating equipment as required in SDCL 12-17B-5 and 12-17B-12. The tests shall be conducted by processing a preaudited group of ballots in a test deck marked to record a predetermined number of valid votes for each candidate and each measure. A tally sheet shall be created prior to the machine count to fully show how the sample of ballots is marked and what the machine vote totals must be to prove an errorless count. If more than one ballot is used in the election, a test deck shall be made for each ballot that is unique in any way. The test deck(s) shall include for each office and ballot question:

1. One or more ballots with a vote for each candidate and each side of a ballot question;
2. One or more ballots which have votes in excess of the number allowed by law for each office and question; and
3. One or more ballots which contain an undervote.

At least twenty-five test ballots shall be included in the total of all test decks. Individual test decks for individual ballots shall be of sufficient size to prove the accuracy of the system. If absentee ballots are to be received folded, at least ten percent of the test ballots in any individual test deck shall be similarly folded. The person conducting the test of the tabulating equipment shall date and sign the printout, verifying that the results of the
machine's printed paper vote totals exactly match the tally sheet from which the sample of ballots was marked. The test deck(s), tally sheet, and signed printout must be secured and retained with the official ballots.

The test procedure shall include the processing of at least one ballot completely blank to verify that the machine is correctly configured according to SDCL 12-17B-13.1.

If more than one tabulating machine is to be used in the election, each machine shall be fully tested according to the ballot(s) which each machine will be used to count in the election.

In addition to these tests, any test deck may be processed any time before or after completion of the official count.

5:02:09:01.03. Test of direct recording electronic voting machines. Repealed.

5:02:09.02. Approval of automatic tabulating systems required before distribution. Prior to distribution in South Dakota, a company or corporation dealing in automatic tabulating or electronic ballot marking systems shall give written notice to the state board of elections and demonstrate that its system complies with SDCL 12-17B-2 and § 5:02:09:02.01 or 5:02:09:02.03 and is certified as fulfilling the requirements of the Election Assistance Commission 2015 voting system standards by an independent test authority accredited by the Election Assistance Commission. If the State Board of Elections approves the system, it shall issue a certificate of approval.

Any changes or modifications in an approved automatic tabulating or electronic ballot marking system may be certified by the State Board of Elections with or without the demonstration described in this section for initial approval. The modification for the already approved system must have been certified as fulfilling the requirements of the Election Assistance Commission voting system 2015 standards by an independent test authority accredited by the Election Assistance Commission or been certified to meet the national standard by another state. Any change or modification determined to be de minimis by the independent test authority does not need state board of elections certification.

General Authority: SDCL 12-17B-17(1).
Law Implemented: SDCL 12-17B-2.

5:02:09:02.01. Criteria for approving automatic tabulating systems. Before the State Board of Elections grants a certificate of approval, the following automatic tabulating equipment capabilities of an electronic voting system must be demonstrated to the board or its designee. The board shall deny a certificate of approval for automatic tabulating equipment which as demonstrated does not fulfill the following requirements:

1. It enables the voter to vote in absolute secrecy;
2. It enables the voter to vote a ticket selected from all the candidates;
3. It rejects all of a voter’s votes for any office or on any measure if the voter has cast more votes for the office or the measure than the voter is entitled to;
4. It accommodates all measures to be submitted to the voters in the form provided by law;
5. It processes 3,000 ballots at a rate of 15 ballots a minute for a central counting unit;
6. It processes 750 ballots at a rate of 10 ballots a minute for a precinct counting unit;
7. It allows no more than one percent of ballots to be rejected by the machine because of ballot feeding errors during a demonstration; and
8. It accurately counts every ballot for each position voted.

The ballots for testing must contain at least ten contests. The ballots for processing must be at least 90 percent fully voted with the remainder containing overvoted and undervoted ballots. At least 2 percent of the ballots to be tested must be folded in the same manner as absentee ballots.

2. If the system has the capability of marking a ballot on the back side, the races must be split between the front and back of the ballot;
(3) Enables the voter to vote in absolute secrecy;

(4) Presents the entire ballot to the voter in a series of sequential screens that include methods to ensure the voter sees all ballot options on all screens before completing the vote and allows the voter to review all ballot choices before casting a ballot;

(7) Accurately marks a paper ballot for each vote for each position voted;

(15) Has wheels so that the system may be easily rolled by one person on rough pavement and rolled through a standard thirty-inch door frame if the net weight of the system, or aggregate of voting device parts, is over twenty pounds;

(16) Has a method to activate the system for each individual voter and which shall prevent any voter from voting more than once;

(17) Has internal operating system software or firmware, that:
(a) Is specifically designed and engineered for the election application;
(b) Is contained within each voting device;
(c) Is stored in a nonvolatile memory within each terminal;
(d) Includes internal quality checks such as purity or error detection and correction codes; and

5:02:09:04.03. Arrangements for and conduct of voting in precincts where automatic tabulating systems used. The following procedures apply to the arrangements for and conduct of voting in precincts where automatic tabulating systems are used:

(1) The precinct officials shall prepare the voting place before the opening of the polls with all the voting booths, instructions to voters, other voting equipment, and supplies as
provided by the person in charge of the election. These preparations must be made according to the instructions received at the election school held for precinct officials pursuant to SDCL 12-15-7. If an electronic ballot marking system is being used, it must be operational and tested as provided in § 5:02:09:04.05;

(2) The precinct official charged with the duty of issuing the ballot to the voter shall mark the ballot with the official ballot stamp in the location designated by the person in charge of the election;

(3) The official shall issue the ballot along with any other system equipment required for marking the ballot. If requested by the voter, the official shall issue clear instructions or demonstrations for marking the ballot with only the instrument provided and according to the instructions on the ballot and those posted throughout the voting place. The official shall specifically inform the voter that marking the ballot with any instrument other than the one issued could result in the ballot not being counted. All instructions must be given prior to the voter entering the voting booth, except a voter may receive instruction on operating an electronic ballot marking system while using the system;

(4) A precinct official, in the course of instructing a voter, may not show partiality to any political party or any side of a measure being voted on;

(5) Precinct officials shall discharge the duties of instruction with each political party alternating a turn so as to ensure a nonpartisan presentation;

(6) In precincts using optical scan ballots, the official shall instruct the voter to return the voted ballot in the privacy sleeve so that the official ballot stamp is visible by the official before the ballot is placed in the box. The precinct official shall place any ballot without the official ballot stamp in a separate marked envelope not to be counted and give the voter a new ballot;

(7) Upon completion of the voting on election night, the precinct officials shall complete the recap sheet prescribed in § 5:02:09:16. If the ballot count does not agree with the number of voters in the pollbook, the precinct officials shall compare the voters in the pollbook and the registration list and correct any mistakes;

(8) The precinct officials shall securely seal the ballot box pursuant to § 5:02:16:37;

(9) The voted ballots and all spoiled and unvoted ballots are to be transported pursuant to SDCL 12-17B-9 to the person in charge of the election; and

(10) Precinct officials shall secure in the polling place the equipment and supplies that were issued for the purpose of voting or shall return the equipment and supplies to the person in charge of the election.
5:02:09:04.04. Tabulation procedures. The procedures for receiving, preparing, and tabulating the ballots are as follows:

(1) The tabulation technicians shall compare the total number of ballots shown on the return printed by the equipment and the total number of ballots shown on the recap sheet from the precinct officials. If there is a discrepancy in the total number of ballots cast in any precinct, the tabulation technicians shall note the discrepancy on the recap sheet, the sheet shall be signed by a tabulation technician and notice given to the resolution board;

(2) If the total number of ballots exceed by five or more the number of names in the pollbook as found on the recap sheet, the ballots shall be examined by the resolution board for the official ballot stamp. Any unstamped ballots shall be removed and marked as "unstamped - not counted." If the total number of ballots still exceeds the number of names in the pollbook, the ballots shall be placed in a box and one of the resolution board shall publicly draw from the box the number of ballots that is equal to the excess and place these in an envelope labeled "ballots drawn by resolution board to justify totals". The remaining ballots shall then be counted by the tabulation equipment and the count shall be included with the other tabulations to constitute the compiled unofficial returns; and

(3) If a ballot is rejected by the automatic tabulating equipment, the resolution board shall review the ballot as follows:

(a) If the resolution board determines that the ballot is damaged or defective, a duplicate shall be made of the ballot. All duplicate ballots shall clearly be marked "duplicate," shall bear a serial number which is also recorded on the original ballot. This ballot shall then be counted by the automatic tabulating equipment in lieu of the original ballot; and

(b) If the resolution board determines that the tabulating equipment is not reading any mark which is a vote according to § 5:02:09:22, the board shall duplicate that ballot according to subdivision (3)(a) of this section.

If the resolution board cannot reach an agreement on the determination of any mark, the board shall duplicate that ballot according to subdivision (3)(a) without marking any oval in dispute.

If the resolution board cannot reach an agreement on the determination of all of the marks on any ballot, the board shall reject that ballot and label it, "no votes can be determined".
5:02:09:04.05. Election day test of electronic ballot marking system. Prior to the opening of the polls, the precinct superintendent must test the electronic ballot marking system for proper operation using the following procedure:

(1) Use only the test ballots provided by the person in charge of the election which are labeled "TEST BALLOTS";

(2) Mark at least two "TEST BALLOTS" using the electronic ballot marking system by selecting various candidates and ballot questions using the touchscreen, keypad, and headphones;

(3) You must successfully mark two "TEST BALLOTS" before allowing voters to use the electronic ballot marking system;

(4) If the test is not successfully completed, open the polls at 7:00 a.m. No voter may use the electronic ballot marking system until the test is successfully completed.

5:02:09:05. Recount procedure. The following procedure shall be used in recounting any election counted by an automatic tabulating system:

(1) If a discrepancy in the number of ballots for a precinct is discovered during ballot tabulation and is not resolved at that time, the county auditor shall make every effort to resolve the discrepancy following the official county canvass and prior to the convening of the recount board;

(2) The recount board shall first examine each ballot to determine if the official stamp has been placed on the ballot and may not count any vote on an unstamped ballot;

(3) If any discrepancy remains after subdivisions (1) and (2) have been completed and the total number of ballots in a precinct exceeds the number of names in the pollbook, the ballots shall be placed in a box and the recount board shall draw from the box the number of ballots that is equal to the excess and place these in an envelope labeled "ballots drawn by recount board to justify totals";

(4) The recount board shall review ballots for proper marking procedure according to the voting instructions. Each ballot marked in a manner other than as provided in the instructions to voter and which may not be counted by the machine shall be hand counted or
duplicated in the manner used by a resolution board and the duplicate counted by machine. The recount board shall determine the voter's intent based on the standards found in ARSD 5:02:09:22;

(5) The recount board shall review each ballot to determine if there are any write-in votes. Any write-in vote may not be counted but all other votes for which the voter's intent can be determined shall be counted;

(6) The recount board shall examine the ballots reviewed by the resolution board to determine the correctness of the initial rejection or duplication. The recount board shall rule on whether each mark is to be counted or rejected according to § 5:02:09:22;

(7) The recount board shall test the automatic tabulating equipment according to § 5:02:09:01.02. The board may conduct additional tests of the equipment including a comparison with hand-counted results from a precinct;

(8) The recount board shall count the ballots with the automatic tabulating equipment. A hand count may be conducted to verify the accuracy of the count by the automatic tabulating equipment. If any discrepancy is found, the discrepancy shall be resolved before the recount is concluded. If any vote cannot be accurately counted by the automatic tabulating equipment but can be hand counted, the hand count tally of that vote shall be added to the count by the automatic tabulating equipment;

(9) The recount board shall complete the Certificate of Disputed Ballot as provided in § 5:02:19:09;

(10) Any question arising on the recount shall be determined by majority vote of the recount board; and

(11) The recount board shall certify the new returns as printed by the automatic tabulating equipment or as hand counted as the "Official Returns" for the election by completing the Certificate of Recount as provided in § 5:02:19:08. The Certificate of Recount shall be filed with the person in charge of the election and shall constitute the final returns for the election in that jurisdiction. If the recount involved an election canvassed by the State Board of Canvassers a duplicate original of the Certificate of Recount shall be forwarded to the secretary of state to be incorporated into the statewide totals as provided by SDCL 12-21-39.

The election or counting board will find the duplicate ballots folded together in the ballot box with the ballot stamp on the back copy and the votes marked on the top copy; and
